The easiest way to pick up the screenshot is to pull the palm over the screen from the right. You can also use the PEN on the screen, by entering air commands in the menu, or communicating the Bixby Voice Assistant "Pick up the screenshot". If you want to use the buttons, press Bixby buttons and volume buttons simultaneously. This article describes four quick and easy ways to pick up Samsung Galaxy Note 10 and Note 10+. If you use the Galaxy Note 10 or Note 10+ and you must quickly pick up the screenshot, the simplest way is to pull over the screen (more precisely along the arm). You can download right or right, but if you haven't done it yet, you may need to edit the settings in the settings. Go to Settings> Advanced functions. Select movements and gestures. Then tap to turn on the palms. Another easy way to pick up the screenshot in your note 10 or note 10+ is the use of the PEN and Air menu. Go to the screen where you want to pick up the screenshot and then remove the pen with from the dock. In the Air Commands menu that appears, click the write screen. If you already have a pen with, all you have to do is move to the screen you want to pick up the screen image, click the Air Command menu and enter the screen. You can also set the IRBUL button to automatically take the screen image. If you want to set it, open the settings> Advanced functions> Pen> Actions of the acts> Press the pen button. Then select the recording screen. Optionally, you can use a pen with for writing in a newly captured screenshot. Otherwise, click to record the arrow to save the screen image in the gallery. If you want to use a combination of buttons for screenshots, you are lucky. Samsung Galaxy Note 10 and Note 10+ Press Bixby and Volume Reduction buttons and take screenshot. The screen flashes briefly and the screen image is stored in the gallery. If you want to use your voice to make a screenshot in your Galaxy Note 10 or Note 10+, you can do it if Bixby is on. In the content you want to pick up the screenshot, turn on only Bixby (or usePress "Key" or "Hey Bixby") and say "take screenshot". The screenshot has been captured and sent to your gallery. If you use a voice command to take a screenshot, you can get commands with screenshots. For example, you can say, "Take a screenshot and send it to Twitter to open a Twitter post with the screenshot. Thanks for letting us know! Get the latest tech news coming every day. Subscribe us why! Whether you've reached a new level in a game or want to upload an important document, you can view the screenshot on your Galaxy phone or tablet. It may vary slightly if the image depends on your device type. Either way, it's a simple and useful process to save images to your device. Note: Applicable screens and settings may vary depending on your wireless service provider, software version, and device model. The screenshot feature may not work in a secure folder. No matter which phone or tablet you have, the screenshot operations are similar, but slightly different depending on the model. You need to find out the power and audio details before purchasing. Usually the volume and power buttons are on the left and the power button (or side key) is on the right. However, on some models the key locations may be reversed. Or you can have all the keys on one side! If you want to get a screenshot, keep the volume manual and the power button (side key) at the same time. The screen will flash to indicate that a screenshot is being taken. Some tablets may have a physical input button instead. To take a screenshot, you can hold down the power and enter buttons at the same time. Note: This feature may not be available on all Galaxy devices. Galaxy Tab S6 Lite does not support changing recording palms due to hardware limitations. However, you can use the tablet's menu buttons or a contactless command to take a screenshot. You can then view and share the screenshot in the gallery app. Wait, there's another way to get a screenshot. On some devices, you can use the Palm RthLLL feature to take a screenshot without pressing a single button. Call from settings and select Palm Roll. Then tap the button next to it to change the palm you want to grab. Now you can take a screenshot by moving the edge of your hand on the phone screen. If you have Bixby voice or Google Assistant installed, you can take a screenshot with a simple voice command. Abay Bixby, aAnd Bixby captures what is on her screen. You can even combine complex controls such as "Hey Bixby, a screenshot and share on Twitter". To use Google Assistant to make a screenshot, just say "Hey Google, make a screenshot". If you are still using s pen with a compatible phone or tablet, should you take screenshots with you? The "S -Pen -Pen -screen recording" can easily absorb a short screenshot from what you do. Note: Only devices with a pre-installed or compatible with S-pin lines output or S-Pen-Pro can be used to record screenshots with S-pencil. Remove the S pen from your device and access the screen that you want to record. Use the S -Stift to press the Air Command menu symbol and then the script. The device automatically makes a screenshot of the page that you visit. If you want, use the commands to write or draw on the screenshot. When you're done, press the Save the icon to save the screenshot in the gallery. You can also use S PEN to record parts of an image with Smart Select. The side field of your device can also help you make screenshots. Simply add the Edge -Tasks panel and the link to record a screenshot. Open the plate as you sweep to the left from the side of the side field on the right side of the screen. Press the settings below and then sweep out the task panel. Press changes at the bottom of the panel. Your favorite connections are displayed on the right. Browse to the links and press a screenshot on the left. Note: The abbreviation that a screenshot takes can be added automatically. You can also select or deactivate additional keyboard links if you want this. Press the less red symbol to delete an abbreviation. Note: You cannot add more than twelve links. Then go to the screen you want to record. Let the side field grip on the left again to open it. Get a second time to the left to display the taskbar. Then press a screenshot. Your device will pick up a screenshot from the current screen. Now you can easily use this link every time you have to record your screen! Is this website too long to make a single screenshot? With the Scroll Capture you can make several screenshots of a single page and combine them all in a single large screenshot. In this way you get the whole picture. It also works with all other screenshot methods. In other words, if you use button combinations, sweep your palm or even S-pin, you will always have it.Possibility to use scroll fixation. Go to the screen you want to capture. Use any of the methods described above to get the screen. When the Smart Capture menu appears, tap Scroll Capture icon - it looks like an arrow down and jumps up and down. Then tap the icon for the second time to start the shift fixation process. Tap the icon under the page or until you reach the desired point. Add the tag to the screenshot menu Smart Capture, tapping the icon with a grille tag. The recommended labels are displayed, but you can create your own. Click Save to save the label. After finishing, tap for the Smart Capture menu band. To view the captured screen, touch a screenshot view or browse the gallery. Note: The smart photography icon will not be displayed on large websites, app screens or images that need to be scrolling. This may not work on certain sites. You can't turn off smart locking on new phones. It is always activated. No matter what device you have, you can view the images in the same place. Just go to the gallery and open it. To open the message panel, you can swipe the screen and tap the message on the screen. On some devices you can touch the Gallery Albus tab to see a set of all the screens you have received. Another way to access these images using videos, documents and downloads is My Files. Just go to and open the "My Files" app, then tap the images under categories to view screenshots. However, you may want to take a step more and keep screenshots so that the MicroSD card, OTG Flash Drive or your computer have too many galleries. There are many photos of photographs, e.g. B. The use of my documents to transfer copies to the MicroSD card. When you overcome this impossible level in the new game, share your victory with your friends by sending a screenshot. If you want to share a screenshot immediately after making it, scroll down the screen and open the message panel. Then tap the arrow down on the screen. Share a screenshot and share it with one of the possible sharing options. Open the gallery and share at any time. Select the album tab, then tap the screen photos. Tap and hold the screenshot you want to share, then tap Share. Use one of the possible sharing options. There are a few moredo this when receiving a screenshot such as adding a personal touch while editing. Immediately after the screenshot, a small menu will appear at the bottom of the screen. To write or draw on the screenshot, select Edit (Pen Symbol) or delete what you don't want. The clipped part will be recorded in the gallery.
